DETAILED ACTION

Applicant's arguments filed on April 24, 2003 have been fully considered but they are not persuasive.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the structure of claim 1 (fuel system interface receiving electrically and mechanically originated over-speed signals) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1 to 3, 5 to 9, 11 to 16 and 18 stand rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites a fuel system interface receiving electrically and mechanically originated over-speed signals. There is no detailed description, or any mention whatsoever, in the specification, as originally filed, of a fuel system interface which receives electrically and mechanically originated over-speed signals. The original specification describes a fuel system interface which receives only electrically originated over-speed signals (figure 2), a fuel system interface which receives only mechanically

Application/Control Number: 09/687,886

Art Unit: 3746

originated over-speed signals (figure 4) and a fuel system interface which receives only hydraulically originated over-speed signals (figure 5).

One of ordinary skill in the art would therefore not know what is the purpose of having electrically and mechanically originated over-speed signals, and how the electrical and mechanical speed sensors would operate in conjunction with each other and how they would interface with the fuel control system.

The claims now recite that the fuel system interface receives a plurality of overspeed signals and that "fuel flow is only initiated when each over-speed signal is removed". This is new matter because there is no basis for this in the specification as originally filed. For example, see page 6, line 15, which states that "fuel flow can only be initiated when the over-speed signal is removed". That is, there is only one overspeed signal, not a plurality as claimed.

Applicant's arguments are merely unsubstantiated allegations. For example, applicant argues that "one of ordinary skill in the art, after reading the specification in view of the Figures, would determine that the subject matter in the specification is described in such a manner as to reasonably convey that the Applicant had possession of the claimed invention, at the time the application was filed." However, no evidence, such as affidavits, has been submitted to support these allegations.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: 09/687,886

Art Unit: 3746

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry relating to the status of this application or proceeding should be directed to the Customer Service Office whose telephone number is 703-306-5648.

Any inquiry relating to patent applications in general should be directed to the Patent Assistance Center at 1-800-786-9199.
